PoetryNest Project Overview

Project Overview

Project Name: PoetryNest

Objective: The PoetryNest project aims to create a dynamic and visually appealing Word Press website dedicated to publishing poetry. The primary goal is to design a platform where users can explore and enjoy a curated collection of poems while providing an opportunity to refine web design and development skills, particularly in Word Press. This project also serves as a practice ground for implementing various web development techniques, including theme customization, plugin integration, and custom CSS styling.

Purpose

Creative Expression: PoetryNest is envisioned as a digital space where personal and shared poetic works can be published and celebrated. It provides a platform for expressing emotions, thoughts, and creativity through poetry.

Skill Development: As a practice project, PoetryNest is a way to explore the functionalities of Word Press, experiment with design elements, and learn how to manage content effectively. The project allows for hands-on experience with theme customization, plugin usage, and responsive design.

Portfolio Building: The project will eventually serve as a portfolio example to showcase web development and design capabilities. It demonstrates proficiency in creating a user-friendly website with attention to aesthetics and functionality.

Current Status

The PoetryNest website is complete but not yet live. It is currently available on a local server and is also hosted on GitHub. The project serves as a finished practice piece for refining WordPress skills and is ready for review and potential further enhancements based on feedback.

Website Structure

Menus

Home: The landing page of the website.

Poems: A collection of published poems.

Recommended Books: A section for book recommendations related to poetry or literature.

Blogs: Posts about poetry, writing tips, and related content.

Downloads: Resources or downloadable content.

Custom CSS Implementation:

The following custom CSS is applied to ensure consistent text capitalization across various elements of the PoetryNest website:

`.main-navigation a, .menu a, .site-navigation a`: Capitalizes text in navigation links.

`.breadcrumbs`: Capitalizes text in breadcrumb navigation.

`.ultp-block-date`: Capitalizes text in date blocks.

`.ultp-block-author`: Capitalizes text in author blocks.

`.panel-title`: Capitalizes panel titles.

`.pt-cv-content`: Capitalizes content in the specified class.

`a[aria-label]`: Capitalizes text in links with an aria-label attribute.

Theme and Plugins

Theme Name: Newspiper

Plugins

Elementor (Free version): For drag-and-drop page building.

Elementor Kit (Free version): Additional templates and widgets for Elementor.

Gutentkit Block (Free version): Enhances the Gutenberg editor with additional blocks.

PoxtX (Free version): For custom post types and taxonomies.

Project Status

Current Status

The website is not live yet, as it is a personal project for Word Press practice

Notes

This project is intended for learning and practice, and it serves as a portfolio piece demonstrating skills in Word Press development, customization, and design.
